INVASIVE SPECIES REMOVAL OPPORTUNITY FOR VOLUNTEERS

RIDEAU VALLEY, August 5, 2010 — The City Stream Watch program is going to be removing dog-strangling vine/pale swallowwort (*Cynanchum rossicum*) from the shorelines of Green's Creek. Learn the types of invasive species, their effects and on natural environments and take part in cutting down the dog-strangling vine. All necessary equipment is provided and there is no cost to volunteers. This is an excellent opportunity to become more familiar with invasive species found in and along our urban streams.

Signup will be by email or phone. On-site lunch will be generously provided by the Monterey Inn Resort and Conference Centre. If you would like a sandwich, please be sure to register by August 9. Once registration is complete, a meeting location will be sent out to all participants.

Location: Green's Creek, Gloucester

Date: Saturday, August 14, 2010

Time: 9:30am to 1:00pm

Please bring: Drinking water, snacks, sunscreen/hat
