RVCA Work In

South Frontenac

The strength and resiliency of our local communities rely on the Rideau River and its surrounding watershed. Without lakes, rivers, streams, forests, wetlands, floodplains, natural shorelines and groundwater aquifers we wouldn't have air to breathe, water to drink, places to boat, swim and fish, water and soil to support agriculture and industry or green spaces to explore and relax in. Simply put, natural areas sustain life. They also support economic development and property values, reduce flood, erosion and drought impacts and they are the best defense against climate change.

Since people and nature are interconnected and interdependent, the Rideau Valley Conservation Authority (RVCA) works closely with local municipalities, residents and other partners to deliver programs and services that protect, restore and enhance the Rideau watershed. RVCA's work also protects people and property from natural hazards like flooding and erosion.

Serving your Municipality

It's hard to find a municipal service that RVCA's programs don't support either directly or indirectly. We provide watershed knowledge and expertise that guides municipal decision-making, assists with emergency management and ensures sustainable development. Our programs also support local economic development, tourism and recreation and we provide these programs in a consistent cost-effective manner across the watershed.

- **Source water protection** — develop and implement local policies to protect sources of municipal drinking water and regional groundwater
- **Flood protection and warning** — reduce the threat of loss of life and property damage, helping municipalities prepare and deal with potential flooding and flood emergencies
- **Low water response** — enable communication amongst water management agencies and water consumers and facilitate optimal management when resources are scarce
- **Development regulations** — regulate development on hazard lands (floodplains, steep slopes, unstable soil) and in environmentally sensitive areas (wetlands, shorelines and valley lands) under *Ontario Regulation 174/06 — Development, Interference with Wetlands and Alterations to Shorelines and Watercourses Regulation*
- **Planning services** — provide professional, technical review of development proposals within or adjacent to natural areas for member municipalities regarding official plan amendments, zoning by-law amendments, plans of subdivision, site plans, consents/severances and minor variances
- **Septic approvals and re-inspections** — provide inspection and approval services for new or replacement septic systems under the *Ontario Building Code* and provide reinspection services for existing septic systems to ensure they function properly, especially around lakes
- **Watershed monitoring** — collect data to better understand watershed health and pursue targeted remediation efforts for maximum benefit
- **Subwatershed and catchment reporting** — present municipalities with science-based information that allows for the adoption and implementation of policies and programs that ensure the health of watersheds and the achievement of long-term watershed management goals
- **Conservation lands** — manage 3,000+ hectares of sensitive, natural land for strategic protection of vulnerable habitats and valuable local resources

What it means in South Frontenac

- *Tay Valley Subwatershed Report* released in 2018 along with detailed reports for its 14 catchments; this is the second reporting cycle for the Tay Valley following the 2011 report.
- *Rideau Lakes Subwatershed Report* released in 2015 along with detailed data sheets for its eight catchments.
- Policy interpretation, implementation tools and other support was provided to South Frontenac municipal staff regarding the *Mississippi-Rideau Source Protection Plan*, which focuses on policies to protect municipal sources of drinking water and is required under the *Clean Water Act*. Information was provided to assist municipal staff with the implementation of non-legally binding policies.
- 79+ hectares of non-developed conservation land in South Frontenac (McEwan Property – 79.97 hectares).
- 18 flood forecasting and 10 low water response messages were issued in 2018; 16 sites monitored for water levels, 6 monitored for precipitation and 6 sites monitored for snowpack.
- 13.6 square kilometres (floodplain, steep slopes, unstable soils, wetlands, shorelines and valley lands) completed in South Frontenac.
- 12 severances, 3 pre-consultations, 2 minor variances and 2 zoning by-law amendments completed in 2018 under Conservation Authority *Planning Act* responsibilities.
- 8 lakes sampled for water quality through the Watershed Watch program – Bob’s, Burrigge, Butterill, Crow, Fermoy, Green, Long Pond and Wolfe Lakes.
- 2 stream water quality sites sampled as part of RVCA baseline monitoring.
- 1 water quality site sampled on Eagle Creek sampled following the Ontario Benthic Biomonitoring Network protocol in the spring and fall.

Serving your Residents

RVCA works closely with watershed residents to provide friendly, technical guidance and support to help landowners develop their property in a sustainable manner. We also provide support and financial assistance to help property owners undertake stewardship projects that benefit the watershed. At our popular conservation areas, the RVCA also provides outdoor recreation opportunities and looks to educate the next generation of conservationists. By investing in our watershed – the land and the people – we are creating healthy, resilient communities.

- **Stewardship programs** – work with landowners to restore and improve our watershed through tree planting and shoreline naturalization projects; provide technical advice and assistance for on-the-ground efforts
- **Grant programs** – help landowners complete projects that improve water quality, wildlife habitat and overall ecosystem health
- **Education programs** – provide high quality curriculum-based environmental education programs to watershed children – building our future watershed guardians
- **Conservation areas** – offer 11 developed conservation areas for public use and enjoyment; inexpensive, recreational experiences including trails, boat launches, beaches, picnic shelters, education programs for schools and community groups and summer day camps
- **Property & environmental information and resources** – create and distribute environmental information; support real estate transactions with site-specific information regarding setbacks from natural hazards; provide peace-of-mind through septic approvals and re-inspections that systems are constructed and working properly

What it means in South Frontenac

- Residents have access to outdoor recreation and education programs at nearby developed conservation areas including Foley Mountain and Meisel Woods.
- 31 property inquiries, 7 applications, 5 permits, 2 clearance letters and 2 complaints processed regarding Section 28 of the *Conservation Authorities Act* in 2018.
- 48,430 trees planted in South Frontenac since 1984 with fundraised dollars totaling \$47,728 projects valued at \$95,607.
- 110 butternut seedlings planted in South Frontenac through the Butternut Recovery Program since 2007.
- 14 Rural Clean Water projects approved in South Frontenac in 2018 – \$33,756 allocated to a project valued at \$79,095; 32 Rural Clean Water projects approved since 2002 – \$71,657 allocated to projects valued at \$120,463.

- 6 Shoreline Naturalization Program project completed in 2018 – 521 trees and shrubs planted totaling 183 metres of new buffer with \$7,602 funding towards a project value of \$7,602; 21 projects completed since 2009 – 1,327 trees and shrubs planted totaling 413 metres of new buffer with \$18,830 funding towards a project value of \$19,653.
- Partnership with Upper Rideau Lake Association to provide lake residents with native shoreline plants.
- Targeted stewardship outreach in 2018-2019 for landowners in Tay Valley Subwatershed.

Dollars and Cents

The RVCA's 2019 budget is \$10.76 million. Levy request amounts to just over half of our revenue meaning another 4.5 million is coming from other sources such as fundraising, the province, grants and special levies.

At the RVCA, every \$1 from our member municipality translates into \$2 being invested into the Rideau watershed.

The RVCA is able to maximize services through alternative funding sources. Impressive value-added efforts are being achieved – work that could not be achieved working alone. It is our creative partnerships that make us stronger – finding creative ways to support valuable watershed programs and services.

South Frontenac 2019 levy = \$23,714.29
